Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 May 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Iwa (2002/0076637). Iwa teaches a toner binder that contains a styrene-acrylic resin derived from carboxyl and glycidyl groups (claims 5 and 6). The binder is produced by the same method of increased temperature and adding water to produce the same gel component and binder physical properties (examples and paragraph 22). It is inherent that the amount of volatile components would be less than 200 ppm because the same method of producing the binder is taught by Iwa.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iwa as applied to claims 1-4 above, and further in view of Nishida (JP 2000-143721). Iwa is

discussed above. The specific pressure is not taught by Iwa. Nishida teaches a method of removing residual volatiles from similar styrene-acrylic toner binders using water and/or steam, temperature, and pressure to reduce volatile to less than 200 ppm (claims and examples). It would have been obvious to one of ordinary skill in the art to include to method step of Nishida with those of Iwa to produce a toner binder with low amounts of volatiles because of the direct teachings of Nishida with the expectations of similar results in producing similar binders.
